MOBILIS

Flexits

FLEXITS is a portable device with a modular, lightweight, and easy-to-assemble structure designed for special or occasional traffic monitoring operations. Equipped with integrated batteries that support up to 6 hours of operation, its standout feature is the flexibility to add functionalities that expand its scope.

EASY TO USE: Ready to operate in just a few steps, in scenarios with vehicles approaching, moving away, or both.

CUSTOMIZATION: Multi-user profiles and different access levels ensure operational control within predefined parameters.

LIGHTWEIGHT: Integrated batteries for up to 6 hours of operation, with a compact and lightweight design.

MONITORING: Simultaneously monitors up to 4 lanes in both directions, accurately identifying the lane and speed of offending vehicles.

PRECISION: Features a high-grade microwave sensor made in Germany. Enables remote operation monitoring via the web from a strategically located control station.

QUICK SETUP: Easy to mount on a tripod and align.

LEARN MORE ABOUT MOBILIS

Mobilis is a 100% Brazilian company that, since its foundation, has been dedicated to offering innovative solutions that promote safety and intelligence for cities.

With a diverse portfolio of cutting-edge technologies and a highly specialized team, **Mobilis** stands out as a reference in urban management innovation, developing clients in several cities in Brazil and around the world.
