

VIRTUAL PATIO **E-BOOK**

MOBILIS

Virtual Patio

Revolutionizing how agencies manage irregular vehicles. This is the goal of the **VIRTUAL PATIO**. Based on IoT technology and legally supported by the Brazilian Traffic Code, the **VIRTUAL PATIO** replaces physical impound lots with an innovative solution: a smart GPS lock attached to irregular vehicles, allowing them to be relocated to a new address: the owner's residence.

WEAKNESS OF THE TRADITIONAL MODEL

- Lack of impound lot space
- Overcrowding in impound lots
- Limited blitz capacity
- Dependence on auctions
- Vehicle custody issues
- Breeding grounds for dengue mosquitoes
- Soil contamination from oil and fuel leaks

BENEFITS OF THE VIRTUAL PATIO

- Enhances blitz operations
- Agile local traffic management
- Optimized public resources
- Convenience for the vehicle owner
- Environmental benefits
- Increased municipal revenue:
50% of the IPVA (vehicle property tax) collected is allocated to the municipality where the vehicle is registered

LEARN MORE ABOUT MOBILIS

Mobilis is a 100% Brazilian company that, since its foundation, has been dedicated to offering innovative solutions that promote safety and intelligence for cities.

With a diverse portfolio of cutting-edge technologies and a highly specialized team, **Mobilis** stands out as a reference in urban management innovation, developing clients in several cities in Brazil and around the world.
